

New Products

Li-MnO₂ Battery--9V

Application: Smoke alarms/Medical device/High-grade toys/microphone

1. High energy density (equivalent to 5 pcs of alkaline 9V batteries or 10 pcs of carbon-zinc 9V batteries)
2. More than 10 years of shelf life
3. High voltage and smooth discharge curve
4. Low impedance & temperature performance
5. Less than 2% capacity fading every year
6. Wider temperature application range

Type	Typical Capacity (mAh)	Nominal Voltage (V)	Dimensions (mm)	Internal impedance (mΩ)	Cut-off voltage (V)	Continuous current (mA)	Pulse current (mA)	Operating Temperature
CR-9V	600/800	9.0	26x17x48mm	NA	5.4V	115mA	400mA	-40°C~60°C
CR-9V	1000/1200	9.0	26x17x48mm	NA	5.4V	115mA	400mA	-40°C~60°C
